Art Unit: 2644

1. Claims 1 to 3 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, at line 5 “whereby  $m < n$  and the enhancing means have a preferably monotone transfer function is indefinite because it is not clear what  $n$  stands for and what “preferably” means. Does it mean that it is preferable, but it does not have to. Clarification is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 to 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Smiley.

An audio reproducing device which is comprised of an input for receiving an  $k$ -channel input signal (output of 232), an output for supplying an  $l$ -channel output signal to  $l$  loudspeakers (output of 238 and 240), an audio processing unit for processing the input signal (234, 258, 238 and 240), which audio processing unit comprises enhancing means for enhancing a  $m$ -channel signal part of the  $k$ -channel input signal (234 and 258); the enhancing means comprise a non-linear device with a monotone transfer function, which is anti-symmetrical (cosine 234 and tangent 258 are non-linear and a monotone transfer function).
